This powerful book (illustrated in full colour) exposes the fatal flaws of evolutionary thinking. Like no other work that we are aware of, it is authored by nine Ph.D. scientists to produce a coordinated, coherent, powerful argument. All of the authors received their doctorates from similar secular universities as their evolutionary counterparts. Each is a specialist in a field relevant to the subject written about: Natural selection, origin of life, geology, genetics, radiometric dating, the fossil record, cosmology, and ethics. *Evolutions Achilles Heels* directly demolishes the very pillars of the belief system that underpins our now-secular culture—evolutionary naturalism. Its coupled with the Biblical command to reach the lost with the Bibles Good News. In a nutshell, its a comprehensive outreach tool like no other. The nine Ph.D. scientists are Donald Batten, Robert Carter, David Catchpoole, John Hartnett, Mark Harwood, Jim Mason, Jonathan Sarfati, Emil Silvestru and Tasman Walker. Foreword by Carl Wieland and edited by Robert Carter.
