

Lives of the Engineers: With an Account of Their Principal Works; Comprising, Vol. 4 (Classic Reprint)

The present volume concludes the authors Lives of the Engineers. Its preparation was begun many years since. The favourable reception given to the Life of George Stephenson, the principal improver and introducer of the locomotive engine, encouraged the author to follow it by a Life of James Watt, the principal inventor and introducer of the condensing engine. On making inquiries, however, he found that the subject had already been taken in hand by J. P. Muirhead, Esq., the literary executor of the late Mr. Watt, of Aston Hall, near Birmingham. As Mr. Muirhead was in all respects entitled to precedence, and was, moreover, in possession of the best sources of information, the author contemplated Life of Watt was abandoned, and he satisfied himself with embodying the substance of the materials he had collected in a review of Mr. Muirhead's work, which appeared in the Quarterly Review for July, 1858. Having recently, however, through the kindness of M. P. W. Boulton, Esq. (Typographical errors above are due to OCR software and do not occur in the book.)
