

# Mr. Sammlers Planet

Mr. Artur Sammler, who looks back on the civilized pleasures of England in the 20s and 30s, on his acquaintance with Bloomsbury and H.G. Wells, but also on the camps, the war, and a death ditch in Poland, is above all a man who has lasted. Moving now through the chaotic and dangerous streets of New Yorks upper West Side, Mr. Sammler is attentive to everything and appalled by nothing. He brings the same disinterested curiosity to the activities of a pickpocket observed on an uptown bus, to the details of his niece Angelas sex life, and to his daughters lunacy as to the extraordinary theories of one Dr. V. Govinda Lal on the use we are to make of the moon now that we have reached it. Is it time to go? Sammler asks dispassionately. Are we to blow this great blue, white, green planet or be blown from it? Under the comedy and sadness, the shocking force of much of the action, and the superb character-drawing of this brilliantly-written novel runs a strain of speculation, both daring and serene, on the future of life on this planet, Mr. Sammlers planet, and any other planets for which we may be destined.
